Even though streaming is all the rage these days, torrenting is still a popular option for people looking to download their favorite movies, music, or TV shows. Basically, they offer people an alternative to DVDs, Blu-rays and CDs. Torrents are a handy tool that most internet users are familiar with. It's a unique way of sharing files that has unfortunately gotten a bad rap in the past. Several torrent sites have come and gone over the years, and many have gone out of business. However, there are those who managed to survive and continue to be popular. In this article, we will discuss the 10 best torrent sites for 2022 that are still doing well! **DISCLAIMER:** We at VPNOnline.com or the services we recommend condone the use of torrents for illegal file sharing, copyright infringement or hacking. Torrents should only be used for legal file sharing and downloading. NordVPN is the most recommended VPN for legal torrenting. For a limited time, you can get 68% off your NordVPN subscription. Protect yourself with a VPN and download faster without your ISP throttling your internet connection. Download Faster with NordVPN Even though streaming is all the rage these days, torrenting is still a popular option for people looking to download their favorite movies and music, or a TV show. Basically, they offer people an alternative to DVDs, Blu-rays and CDs. Torrents are a handy tool that most internet users are familiar with. It's a unique way of sharing files that has unfortunately gotten a bad rap in the media. Several torrent sites have come and gone over the years, and many have gone out of business. However, there are those who managed to survive and continue to be popular. In this article, we will discuss the 10 best torrent sites for 2021 that are still doing well! Here are the best movie torrent sites in 2022: the future of online safety. 30 Day Money Back Guarantee Probably the most popular torrent site in the world. This site was founded in 2003 by the Swedish think tank Piratbrynan, making it the oldest site on this list. It is also one of the oldest torrent sites on the Internet, having experienced several seizures and domain closures, only to reappear each time with a new web address or domain name. The company's headquarters in Stockholm were raided by police in December 2014, when several of their computers and equipment were seized, causing The Pirate Bay to go offline along with several other file-sharing sites around this time. However, as has happened many times before, the site survived again and returned on January 31, 2015 with a phoenix logo symbolizing its rebirth from the ashes. The Pirate Bay database contains millions of files that use the Skull system to identify files uploaded by trusted users. The site displays multicolored skulls next to usernames. Each color represents a different status or class of membership: Green Skull - Awarded to VIPs or users who have been sharing safe and high-quality torrents with consistent consistency for a long time. Pink Skull - Powered by trusted and verified users. Site administrators and moderators trust these uploaders to host and upload safe and functional files to the site. The Blue Skull is awarded to the site's most invaluable "representatives" who have helped protect the site from scam files, spam, malware and children, pornography. They were also called "assistants" and served as a kind of administrative assistant. Helpers were removed from the website in February 2015. RARBG was founded in 2008 and currently operates in multiple domains. It specializes in downloading high-quality video releases, but it also has other files like music and games. Due to the huge pressure from BREIN (company in the Netherlands), RARBG was forced to close for one week in December 2008. Access to this popular streaming site was also blocked in several countries including the United Arab Emirates, England, Portugal, Denmark, Australia, Ireland and Finland. In 2018, it averaged over 300,000 visitors per day. Registration on the site is currently closed, but users can still download torrent files from it. Download faster with NordVPN Founded in 2007, this site specializes in providing magnet links and torrent files that can be used for P2P (peer-to-peer) file sharing. In 2018, it ranked as the third most popular torrent site on the internet. It reached its peak of popularity after the closure of Kickass Torrents. Its website has also undergone an aesthetic overhaul and introduced new features. Google has banned the site from appearing on its results pages, meaning it will never appear when people search for it on Google. The ban came after a complaint by Feelgood Entertainment in 2015. In October 2015, 1337X moved from its old *.pl* domain to *.io*. This was done in part to prevent blocking, as the site can still be accessed by manually typing its address into the address bar. It's like an alternative to The Pirate Bay, due to the possible closure of the site. It's an unofficial clone of the original Torrenztz, site that was shut down in August 2016. At launch, it initially indexed a total of 60 million torrent files. The original Torrenztz website served as a BitTorrent search engine. It was started by user Filippy who was in December 2016, former employees of the site revived it at a new address. This torrent site is exclusively dedicated to movies. It has a great layout and some great movie torrent downloads to choose from, making it a popular destination for movie lovers. Another major benefit of YTS.AM over other torrent sites is how easy it is to deal with the user's bandwidth. It is the spiritual successor of the original YTS and YIFY group. YIFY torrents have become popular among cinephiles with high-quality downloads of the latest Hollywood movies and series. Those who expect to find other content here should look elsewhere as YTS.AM only offers movies and nothing else. So don't expect to find games, music or other types of downloads on this site. Torrent Download has been around since 2007 and has over 16 million torrents. It has everything you are looking for from games, movies to e-books. It is currently banned in the UK. The website has a very simple interface and for the most part it is easy to navigate. The advanced search option allows users to filter search results to find the files they need faster. It also allows users to rate files and leave comments, which helps reduce fakes on the site. This is one of the best torrent sites when it comes to selection and download quality. If you are looking for the latest episodes of your favorite TV shows then this is the page for you. EZTV is the best torrent site to download TV shows. Founded in 2005, it has withstood difficult trials when the site was shut down due to a "hostile takeover", but has since recovered and is back under new management. On this site you can find everything related to reality shows, popular series and even NASCAR races. Its interface may look like 2008, but its use is easy and very simple. As the old saying goes, "If it ain't broke, don't fix it." Download faster with NordVPN Users should always be aware of fake clones of popular torrent sites, as there are many of them. A Avoid downloading torrents from untrusted sites as their files are likely to contain viruses and malware. Sites like The Pirate Bay and EZTV have a list of secure proxies that they use when their main domains become unavailable. Before downloading a torrent file, check the comments section and read what other users are saying about it. Most torrent sites use a system where they mark files as downloaded by trusted users. If the file you want to download has no label, check the comments section first, as users usually leave a comment whether the file is legitimate. The best way to be safe when downloading from torrents, sites must use a VPN. A VPN helps hide your IP address so that the government and your ISP don't know about your activities. You can download dozens of streams in one day and never get caught if you use a VPN to cover your tracks. Which VPN Should You Use? The best choice would be Surfshark VPN as it is considered by many experts to be the most recommended VPN as it provides unlimited P2P sharing, high download speed and the highest level of security. It is also constantly adding new countries to its server list, giving users more options if they decide to switch servers. NordVPN is another highly recommended VPN. This is a great choice for users looking for a cheap VPN as it is the best cheap alternative. Users can use NordVPN starting at \$3.99 per month. Equipped with unlimited P2P sharing and bandwidth, it can secure your entire home network. These are just some of the best VPN providers, and there are many more to choose from. Before choosing a VPN service, always remember to look for one that offers good value for money. Finding a reliable torrent site that doesn't infect your device with malware and viruses can be incredibly difficult. As a result, many torrent users tend to use the most popular torrent sites they know and have been using for years. You can't go wrong if you decide to stick with the top 10 torrent sites, but there are plenty of other equally good torrent sites that you can use. One of the most important features of the leading torrent sites is downloader verification. This makes them less likely to download malware, spyware, and viruses. Good torrent sites also have an active community of moderators who review each download (or at least some downloads) to help you spot healthy torrents and weed out potential leeches. They also have a torrent tracker that tells you what files are available at any given time. It is almost impossible to remove all bad streams from the site, so you will find fewer bad streams in the main stream, websites because they check downloads. Due to careful testing, they also have fewer or no false and misleading magnet links. The best torrent sites are known to encourage sharing for faster downloads. They're also regularly updated, have mirror links, and allow you to filter search results by file size, file type, file quality, and so on. Unfortunately, even the most popular torrent sites have annoying pop-up ads, not a reliable yardstick, to assess the trustworthiness of the site. Luckily, you can use an ad blocker to get rid of those annoying pop-ups. say about the site? You can be sure that someone who has had a bad experience with the site will be able to tell you about it online. If the torrent site is good, you'll likely find some people saying so. Although they have gained a somewhat negative reputation over the years, torrent sites are very useful and have many advantages. Technically, a torrent is only illegal if you're downloading copyrighted material. With that in mind, here are some pros and cons of using a torrent site. Torrenting is a great way to get that hard-to-find software (like an outdated game that's only sold on floppy disks), old movies, e-books, or e-magazines. There are many sources online, even if the primary source or publisher no longer exists. So, you can still get your game torrent even if the original publisher has gone out of business. A peer-to-peer torrent system means you don't have to rely on a central server and have multiple download sources available, even if one of them doesn't work for some reason. If your download is interrupted due to a power outage or lack of internet connection, you can always pick up where you left off instead of starting over. Maximum download speeds for most torrents can never be reached using traditional download methods. This means that even with an average download speed, you can quickly download a file with many programmers. We cannot ignore the fact that most of the software and applications available through streaming are copyrighted material. It is not possible to check the file before downloading it. Although you can see what's in the file, you can't tell how good the information is, such as viruses or pornography. This can put a strain on your internet connection, especially if you upload and download files at the same time this is very important for the whole boot process. If the file is not downloaded, you may not be able to download it. Torrent sites have become a popular destination for just about anyone who wants to get something off the internet because they are convenient and free. All you need is a fast internet connection and a working torrent search engine. Here are some of the most trusted torrent sites where you can download music, games, software, books, movies, and more for free. The most popular streaming site on our list is The Pirate Bay. Even though they have been wrong in the past, they are still the leaders in the streaming world. The Pirate Bay (TPB) was voted the best torrent site of 2018. This torrent site offers high download speeds depending on the speed of your internet connection and contains hundreds of torrent files in various categories. In 2018, 1337X was ranked as the third website on the internet, the most popular torrent sites. This site is a benchmark for torrenting as its catalog contains magnet links and torrent files that can be considered the best alternative to Pirate Bay. This torrent site has an active base of downloaders who post the latest files as soon as they hit the big screen. Using a VPN connection, no matter how reliable the torrent site is, is the best way to stay safe online while streaming. Also, if you only choose a verified torrent, you should be safe. There are many mirrors of these torrent sites, so you should make sure you are not on a cloned site. Download faster with NordVPN There are a lot of scam gangs on the internet today. Even in the world of reliable, there are clones of major streaming sites whose files often contain viruses and malware. As a fan of torrents, you know that a fake torrent link can allow hackers to hijack your device and get your personal details. Here are some tips to help you identify fake files on streaming sites. Torrents with malicious materials including information. If you come across a file with many seeds but no user comments, you should ignore it, as torrent files with more than a thousand seeds often have good user reviews. While not all RAR files can be found to be fake, most movie and music RAR files have been found to be fake. When you come across such material, double-check it before deciding to download. It's best to avoid torrent files that have no content. Since you usually don't get a chance to preview a file before uploading it, it's a good idea to read the comment area and see what people have to say about it. Avoid files flagged as negative or without feedback. If you use a reliable P2P network, choose an efficient VPN provider, streaming is completely safe. Here are some of the best torrent sites you can trust. The Pirate Bay is the oldest place on this list in terms of security. It was created in 2003 by the Swedish think tank Piratbrynan. While trusted torrent sites may contain potentially dangerous files, a community that includes a torrent rating system and comment area can help you determine the best torrents to download. You will probably find your favorite torrents on this site. RARBG was founded in 2008 and currently operates in several different areas. It's known for hosting high quality videos, but it also has other stuff like music and games. While RARBG isn't hosted on a server with a secure connection (which makes using a VPN all the more necessary), it does have an active community of users who help, moderate, rate, and comment on torrents that can help you determine which ones. the good ones and the bad ones. 1337X was the third most popular torrent site on the Internet in 2018. This is a great torrent site with movies, TV shows and music. If you are using the original site and do notAmong the many clones, the 1337X meets all security requirements, including a special secure connection. It is usually not possible to determine the quality of movie torrents or torrent content until the download is complete and you can open the torrent download. One way to get an idea of the quality of the video files in the torrent is to look for a label that says "DVDRIP, HDRIP, BLURAY, SCREENER" Cinema, so the quality is not the best. DVDRIP and HDRIP are the two most popular movie formats, and HDRIP has higher quality and is often a good space saver. BLURAY is the highest quality you'll ever get; Most movies are played in 1080p resolution, but you can also find the "FULL BLURAY" label, which is slightly better. Remember that a good quality movie should not be less than 600 MB. High Definition movies (HDRIP) are larger than +2 gigabytes, while Blu-ray discs are larger than 5 gigabytes. Although you can't check the file before downloading it, it should give you an idea of the quality of the movie. While these large files may take longer to load, smaller files should be of poor quality, especially in fast-moving scenes. Before you can start downloading movies, you must first install a torrent client on your computer. Follow these steps to download a movie after downloading and installing uTorrent: Run uTorrent and locate the torrent file of the movie you want. You can activate the torrent downloader by clicking the download button or download link when you find it. After clicking the download button or link, a pop-up will appear asking you to launch uTorrent. Just click "Open uTorrent" to start downloading. You can then find the downloaded file by right-clicking on it and selecting "Open Containing Folder". Torrenting is a popular way to get your favorite movies, music or series; it might not be entirely legal. Here are some of the best movie download torrent sites: The Pirate BayRARBG1337XTorrent2 Even though there are multiple music streaming platforms such as Spotify and YouTube these days, many people still turn to torrent sites to download music files for offline access. Here are some of the best sources for music torrents: KickAss Torrent. When it comes to music, this torrent site offers a wide variety of free independent music. 1337X: 1337X is one of the most advanced torrent sites out there. If you search for a song or album, you will get a list of torrents related to that piece of music. 30 Day Money Back Guarantee + 3 Months Free By: Michael Miller Michael is the CEO of VPN Online, one of the fastest growing cybersecurity media companies. VPN Online was launched in 2019 after Michael consulted with many Fortune 500 companies and noticed that many of their employees were not cybersecurity savvy. would.
