Barcelona 2010 squad formation

Barca squad in 2010.

I still can not believe that it is only 23. "The gauge" finally came and will be one of the most important attack components of the club's football team this year. Sometimes, especially against Real Madrid, they had difficulties. Dani Alves covered more terrain than now, and finally, ValdÃ© s is a better goalkeeper than Bravo; He had a very tactical brain and you could count on him in the ball. Rakitic is a more powerful player and likes to take advantage of the opportunities outside the box, but Xavi will go down in history as one of the best league for his role in the Midfield. In the terms of the front TBE would have to go for 2015/16 alignment. Involved by tweeting @Revistadeliga with the thoughts of him or comment under SachinculeFull Squad and Formation for the 2010-1 season. Maxwell loves to move forward and has greatly improved the crossing of him. Coming on the back of an incredible World Cup he should definitely adjust to the style of play, especially if he deploys on the left, where he has tormented the defenders by cutting off from the edge of the box, followed by a clinical finish. Seydou Keita is expected to provide coverage for the young player in case of injury or suspension. The Master of the Mediocampo is one of the most creative players on the face of this planet and, probably, the engine of the best national teams and club clubs. At the age of 26, he still has remained a lot in the tank and he could be the final piece in the puzzle so that the club reinforces its center center. The heart of FC Barcelona, à €
