12v dc water sprayer pump motor 200 psi. How to make water pump 12v dc motor. 12v dc motor water pump pdf. Dc 12v 5.5m 1000l/h brushless motor submersible water pump. Water pump 12v dc motor price in india. 12v dc motor water pump solar pump. Dc 12v solar powered water pump motor 700l/h. 12v dc motor water pump price.

What makes this particular electric outboard motor very unique, is not only its short shaft, specifically designed for inflatable boats, kayaks and KaBoats, but also its light weight, due to use of brushless motor. Not only this trolling motor portable, but it also lighter than any comparable regular, non-brushless 12V trolling motors. That is important feature when carrying boat and motor around. It folds down to smallest size for its class, only 39"x12"x6" in size. Motor head only 23" long, compare to our regular trolling motor with 32" long motor head. Also, it has 600W power output, compare to 540W output of other model we carry. And, it comes with Digitmax Energy Saver, so it will run longer on same battery than any other comparable power trolling motors. Another very unique feature of this trolling motor is a tilting throttle handle with 10 adjustable positions. Adjustable handle allows it to be lifted almost 45 degree up, or all the way down, parallel to the motor shaft. This makes trolling motor more portable, compact and allow much easier transportation and storage than other brands trolling motors with fixed perpendicularly trolling handle. Adjustable angle throttle handle also makes motor operation more comfortable, because you can raise it up or tilt down. Our new brushless trolling motor model uses 12V, with 50 Amp Max Draw. Battery Level reader built into controller housing displays accurate available battery power, and shows when battery need a recharging. This electric trolling motor is salt water ready, and can be used in an ocean, but we highly recommend washing it out with fresh water after each salt water use to extend motor's lifespan. To operate this Trolling motor you will need 12V Deep Cycle battery that sold in any hardware or auto store. You can get Deep Cycle battery in Wall-Mart or Costco for about \$55. High-end Deep Cycle battery will run about \$140. To charge battery you will also need Battery Charger, that will run about \$30 to \$60 depending on a brand. Comparable petrol outboard (thrust): 1HP Max Voltage: DC 12V Max Power: 600W Max Amp: 50A Prop Type: 3 blade (9.3" dia) Prop Speed at Full power: Max 1250 rpm Battery Type: 12V 105AH Deep Cycle Decibel Level:
