So thank you again guys! I love the app! For the most part, I love this browser, but there are some quality of life changes that need to happen. I should only be able to go â € ‡ ‡ backtone to the empty tab, if this tab was opened as a new empty guide. Give me patch notes. I should not be able to open a new guide for a page and still be able to hit the rear button and be carried to the page of the empty guide. I really wish there would be more for the application honestly. We apologize for the inconvenience. We work to support sound. Anyway, it works, but it can be better, I hate to write negative comments for something that seems to be difficult to work hard and I'm proud of them for really doing this job, probably just mine that had quality because I used an iphone And Chromebook, it's really cool though staying in devs I'm surprised that it really worked so well as for a free version. I get stumbled to sometimes thinking that I'm in the wrong flap because of it. Please try this on your device. When I was mirroring on the Nintendo switch to get the app on my TV screen (having an old flat screen of Sony that does not mirror), it would work perfectly well with some announcements that I did not care! But a pop-up would appear talking about getting the other pro application, it was annoying and I continued dying (in the game) not knowing what to do when the screen freezes there! My parents will not allow me to spend money me RN being 14- So if this could be fixed, I would literally love it! Thank you if you get there! - Jamie âxâ Â, it works, but personally for me the quality is very bad as super granulate and there are about a second or two delays, it is not horrible if you are watching a video or Movie, but I used the free version.
